

EDA Study Tour

May 19-24, 2019

JAPAN

**Decontamination
Institute**

The **European Demolition Association**, EDA, is the European platform for national demolition associations, demolition contractors and suppliers and one of its main goals is to promote the good practices and techniques that improve the demolition activities and the removal and recycling of debris.

EDA organizes every year activities to share knowledge of the industry and experiences. This year, the association has joined its annual meeting with a professional trip to get a first-hand look of the knowledge and innovations demolition and recycling activities from a strategic country for the industry: Japan.

Join us on Study Tour Japan 2019!

ABOUT EDA STUDY TOUR

The **EDA Study Tour** is an intensive journey that will allow professionals to see the activities of demolition, decommissioning and C&D waste recycling from a different perspective and to visit several manufacturers, demolition sites and specialized contractors.

The travel throughout several cities of Japan includes visits to factories, jobsites, equipment demos and other relevant experiences for demolition professionals.

This is not the first time the association get in touch with Japanese demolition companies and their suppliers in Japan. In 1988, the first symposium EDA-RILEM was held in Tokyo and a large EDA delegation went to Japan to know its demolition industry, technology, equipment and way of work.

Japan, whose name means “the origin of the Sun”, is an archipelago with more than 3 000 islands that stretches along the east Asian coast of the Pacific Ocean. The largest and main island is Honshu where the big cities of Tokyo and Kyoto are located.

ALL PARTNER

Japan Demolition Contractors Association (JDCA): Created in 1993, is the national association in Japan committed with the development of advance demolition technology and it encourages recycling and reusing construction by-products and developing appropriate control-disposal of waste. www.zenkaikouren.or.jp

EU-Japan Centre for Industrial Cooperation (CIC): It is a non-profit organisation and a unique venture between the European Commission and the Japanese Government. It aims at promoting all forms of industrial, trade and investment cooperation between the EU and Japan and at improving EU and Japanese companies' competitiveness. www.eu-japan.eu

ACTIVITIES AND ITINERARIES

Professional ticket

HITACHI, CONSTRUCTION MACHINERY CO., LTD., headquartered in Tokyo, Japan, is a global Construction Machinery company with approximately 20,000 employees worldwide. Fiscal 2017 (ended March 31, 2018) consolidated revenues totaled 959 billion yen.

HITACHI CONSTRUCTION MACHINERY will focus more than ever on the Construction and Mining Machinery Business, which includes Hydraulic Excavators, Wheel Loaders, Rigid Dump Trucks, Compaction Equipment, Applications and Mine Management Systems.

The Hitachi logo, consisting of the word "HITACHI" in a bold, orange, sans-serif font.The NPK logo, featuring the letters "NPK" in a bold, orange, sans-serif font, flanked by two horizontal orange bars.

NPK NIPPON

NPK is a company based on monozukuri (translatable as making, fabricating and crafting) and on the development of unique product lines that match customer needs and also serve society as a whole.

Nowadays, as it moves forward in its operations serving the construction, pneumatic and chemical industries, NPK is determined to maintain that precious legacy, through excellence in the crafting, improvement and servicing of products for its customers around the world.

OKADA AIYON

OKADA AIYON CORPORATION is a Japanese heavy equipment manufacturer who are providing a broad range of sophisticated demolition equipment since 1938.

The company offers a variety of attachments and has been an innovator in the field for many years, providing a broad range of sophisticated demolition equipment.

OKADA is continually looking for ways to expand the capabilities and versatility of the demolition attachments that provides and as a result of that effort has become one of the world's leading authorities on hydraulic attachment technology.

The Okada logo, featuring a blue stylized cube icon followed by the word "OKADA" in a bold, blue, sans-serif font.

KOBELCO

KOBELCO CONSTRUCTION MACHINERY CO., Ltd. (KCM), headquartered in Tokyo, is one of Japan's largest manufacturers of construction equipment.

The company started in 1930 as a division of Kobe Steel and today it manufactures a wide range of construction machinery, which is sold worldwide, including a range of crawler cranes from 39 U.S. tons to 882 U.S. tons capacity and a line of rough-terrain mobile cranes.

In 1999 the company was separated from the main Kobe Steel group and nowadays it operates as an independent subsidiary, although Kobe Steel remains the majority shareholder.

The logo for Kobelco, featuring the word "KOBELCO" in a bold, blue, sans-serif font.The logo for Komatsu, featuring the word "KOMATSU" in a bold, blue, sans-serif font with a registered trademark symbol (®) to the right.

KOMATSU

KOMATSU is a company established in May 13, 1921, that is dedicated to the manufacture and the sale of construction and mining equipment, utility equipment (compact machines), forest machines, industrial machinery and others.

The company is one of the largest worldwide manufacturers of construction, mining and utility equipment, and also delivers forest machines and logistics.

It has manufacturing operations across the globe, including in Japan, Asia, America and Europe.

CATERPILLAR

CATERPILLAR is one of the world's leading manufacturers of construction and mining equipment, diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives.

The company principally operates through its three primary segments - Construction Industries, Resource Industries and Energy & Transportation - and also provides financing and related services through its Financial Products segment.

For more than 90 years, CAT has been making sustainable progress possible and driving positive change on every continent.

The logo for Caterpillar, featuring the word "CATERPILLAR" in a bold, black, sans-serif font, with a yellow triangle pointing upwards at the bottom left of the letter 'A'.

KOBE

KOBE is the sixth-largest city in Japan and the capital city of Hyōgo Prefecture. It is a fortunate town to be surrounded by the natural landscape of both mountains and sea. The city is widely associated with cosmopolitanism and fashion, encapsulated in the Japanese phrase, "If you can't go to Paris, go to Kobe."

- Sorakuen Garden
- Akashi Kaikyo Bridge
- Meriken Park

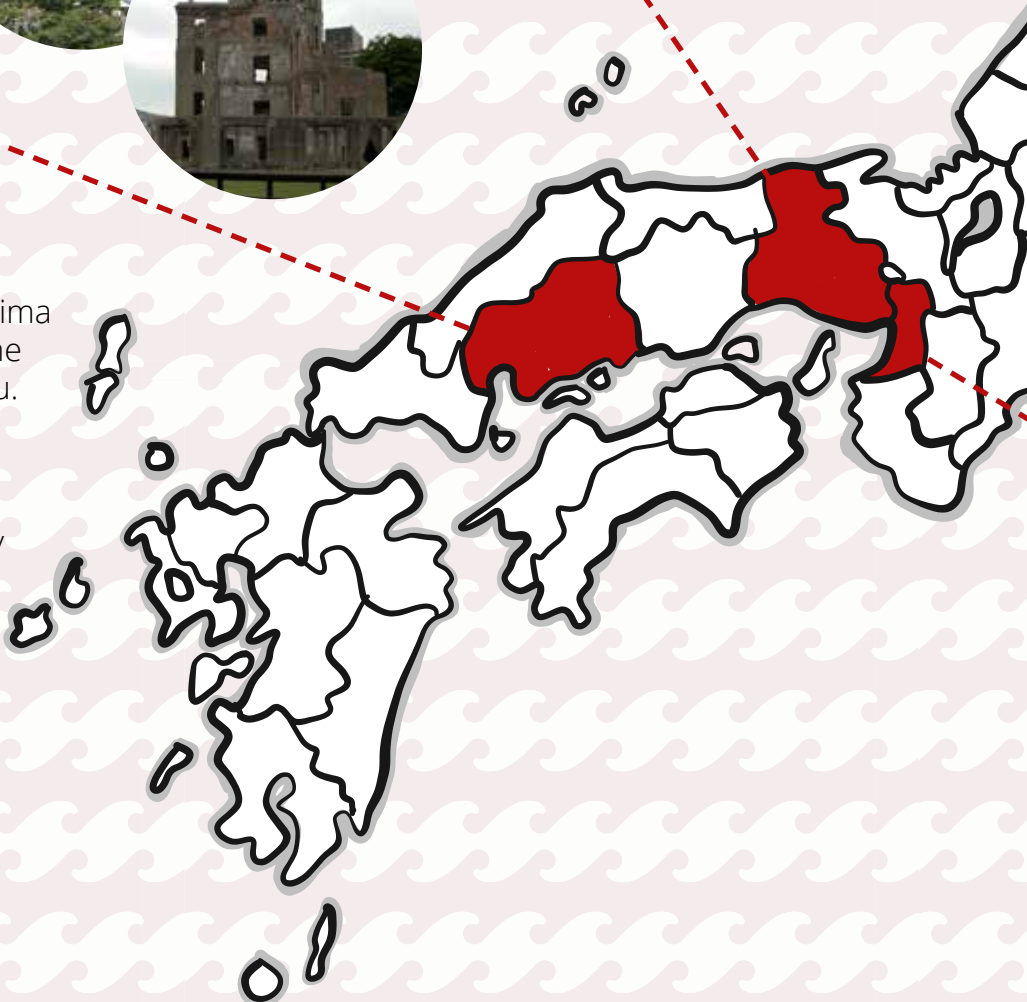

ANA Crown Plaza Kobe

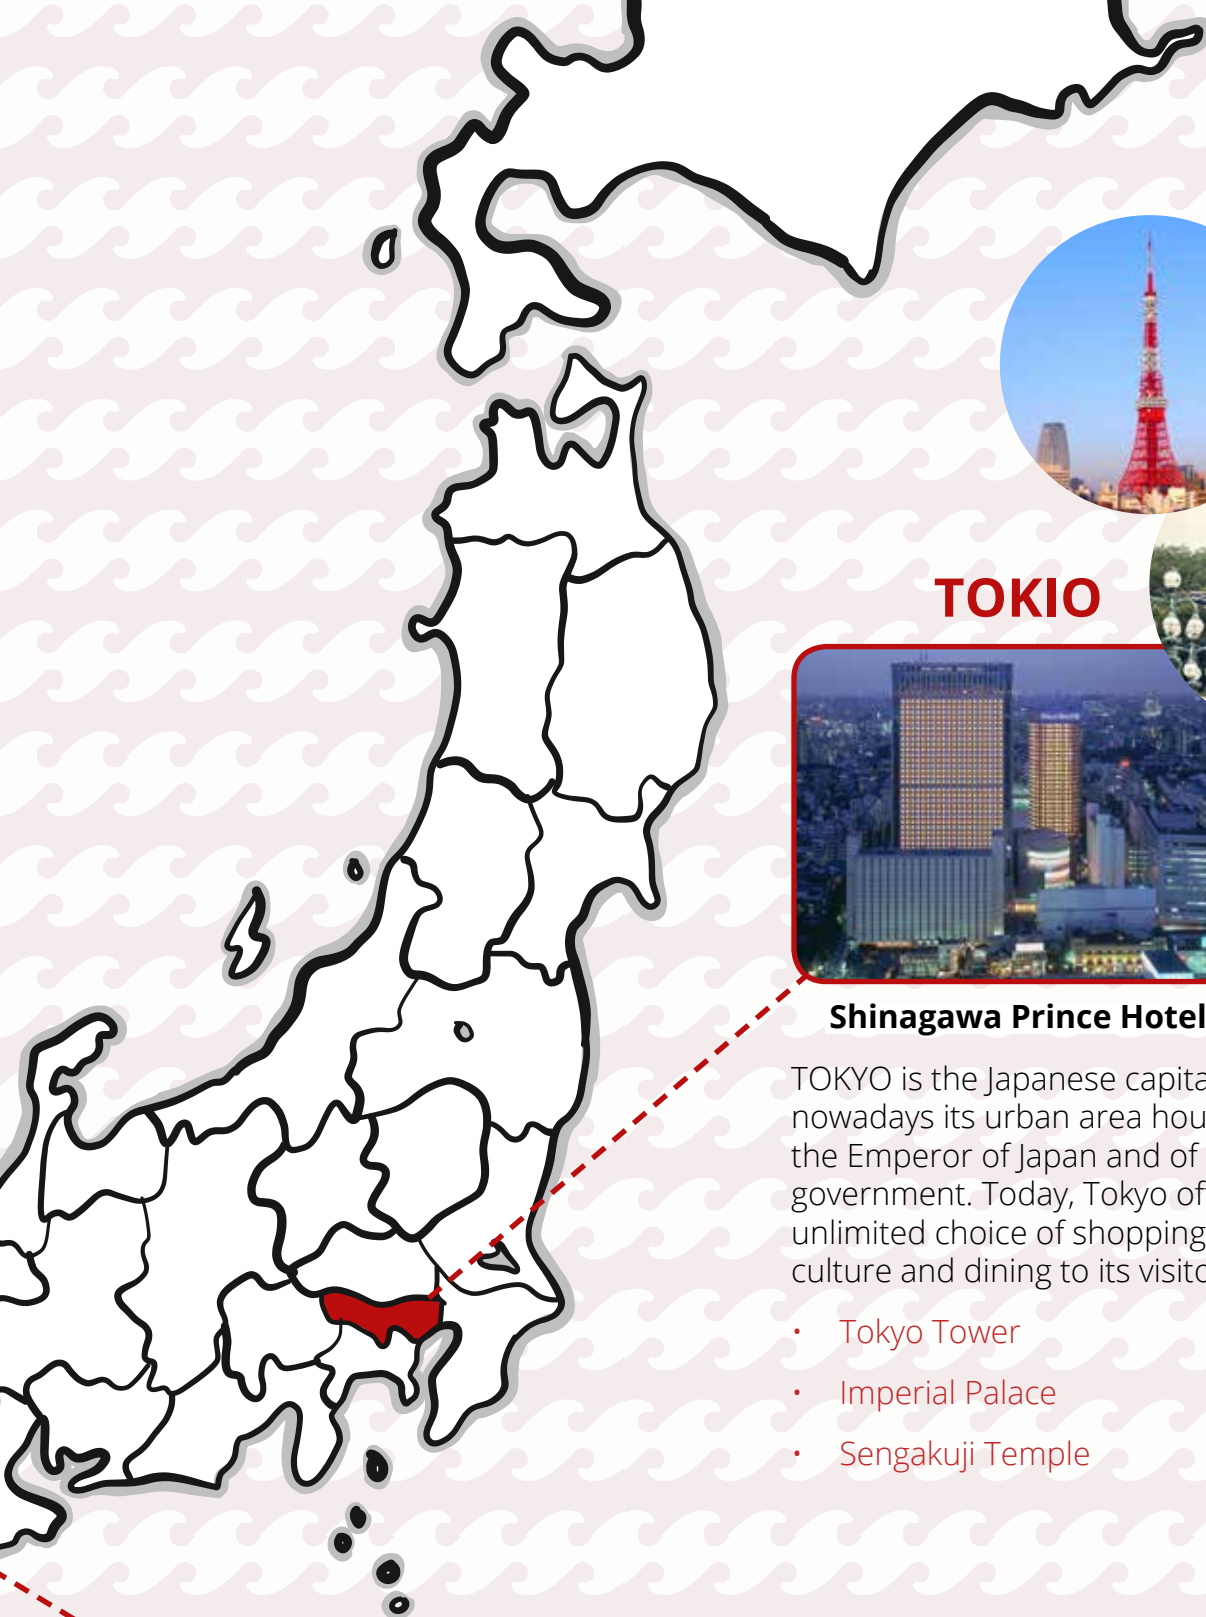

HIROSHIMA

ANA Crowne Plaza Hiroshima

HIROSHIMA is the capital of Hiroshima Prefecture and the largest city in the Chūgoku region of western Honshu. Hiroshima's origins can be traced to the end of the 6th century and beginning of the 7th century when the area began to prosper. The city is a treasure-trove of historical buildings and locations.

- Hiroshima Castle
- Memorial Cenotaph
- Atomic Bomb Dome

TOKIO

Shinagawa Prince Hotel

TOKYO is the Japanese capital since 1869 and nowadays its urban area houses the seat of the Emperor of Japan and of the Japanese government. Today, Tokyo offers a seemingly unlimited choice of shopping, entertainment, culture and dining to its visitors.

- Tokyo Tower
- Imperial Palace
- Sengakuji Temple

OSAKA

Osaka is the Japan's second largest metropolitan area after Tokyo. It was formerly known as Naniwa and was once Japan's capital city, the first one ever known, before the Nara Period (when the capital used to be moved with the reign of each new emperor)

Become a member of EDA to get the reduced price in the Study Tour

If you are a National Association or a company that provides or contracts demolition products and services and you would like to get on board of a mutually rewarding cooperation, EDA is a perfect place for you. EDA welcomes the following actors of the industry as its members:

- Demolition contractors, from countries with a National Demolition Association or Federation
- Demolition contractors, from countries without a National Demolition Association or Federation
- Engineering or consulting company working in Demolition
- Demolition suppliers: manufacturers, dealers,...

**BE RECOGNIZED IN THE
DEMOLITION INDUSTRY**

BECOME A MEMBER OF EDA

Visit www.europeandemolition.org/get-involved/ to know the details of the incorporation process.

IMPORTANT DETAILS AND ADVICES

- Being in possession of a valid passport is compulsory. In addition, it is mandatory to have the passport in good condition before traveling because Japanese authorities or domestic airlines may deny you travel if your passport is damaged.
 - The name you write on the registration form must be shown exactly as it appears on your passport (with all compound names, if any).
 - Although EDA has a general travel insurance, it is highly recommended to get a private travel and/or health insurance with coverage abroad.
 - Any food allergy or intolerance must be previously communicated to EDA when you make the reservation.
 - Before traveling, please check with your Japanese Embassy in your home country if you are required to obtain a visa to enter and leave Japan.
 - In the domestic flights and in the hotels in Kobe and Hiroshima, it is necessary to take a carry-on bag, a trolley or even a backpack. The main suitcase you bring from your country of origin will remain in the hotel in Tokyo until the day you leave Japan.
 - If you suffer from any medical condition that for your own well-being, it is necessary for the organizers of the trip to know, please indicate when you make the reservation.
 - Smoking is not allowed in the rooms.
 - Please read the Cancellation Policy before sending your reservation: <https://www.europeandemolition.org/services/cancellation-policy>
- The deadline to receive refunds for EDA Study Tour is:

- Up to 20 business days before the starting day of the event: full refund, less a service fee (200 €).
- At least 10 business days before the starting day of the event: 50% refund.
