On 11th March 2022, Deutscher Abbruchverband e. V. – DA (German Demolition Association) is organising the FACHTAGUNG ABBRUCH 2022 again at the STATION-Berlin, Luckenwalder Strasse in Berlin. With its rustic charm, this industrial monument, an old post station, is particularly suited to the demolition industry.

After last performance in 2020 with over 1,100 participants and 127 exhibitors attending the annual meeting of European players in demolition and dismantling and the inevitable pause this year the expectations and joy of the event for 2022 are high.

Lecture programme

Dr. Hajo Schumacher, the well-known journalist and publicist, will give **the keynote speech on the topic – “Demolition, change, awakening - where is the new German government heading?”** A pointed analysis 6 months after the German parliament elections, which is of interest not only for Germans.

Afterwards, there will be 12 further lectures on the programme on current and interesting topics around demolition. In their lectures, the proven experts will provide a great deal of practice-oriented information on interesting construction site reports as well as on the handling of pollutants, recycled construction materials and legal requirements.

This year, among other things, information will be provided on “Pilot project Campus Essen – Essen’s highest demolition site aims for platinum status”, as well as on “Problem areas in recycled material specifications for building products”. Other interesting lectures such as “The safe disposal of asbestos-containing grinding and milling materials: a real or a contrived problem?” or “Selected best practices of controlled blasting of buildings” contribute to the proven mix of topics, as do various other specialist lectures, such as “Deconstruction of the Coca Cola building in Bremen – industrial area in the change of time since 1878” or the “Complex use of different demolition methods for 250,000 t of reinforced concrete” and many more.

As the number of international visitors continues to grow, simultaneous translation into English will be offered again.

Accompanying professional exhibition

By the end of November the professional exhibition with its wide range of products had already attracted over 70 exhibitors with over 750 sqm area registered. The current list of exhibitors can be viewed on the event website and registration as an exhibitor is still possible until 3rd January 2022.

Dialogue evening

As in the last years, the dialogue evening will also take place in the STATION BERLIN, so that the exhibition will remain open parallel to the dialogue evening. This improves the exchange and information opportunities for both sides - participants and exhibitors - and enables a variety of networking opportunities.

Sponsors

The fact that the FACHTAGUNG ABBRUCH is well established is shown by the very gratifying participation of sponsors who have already been won. The DA would like to thank its supporters for this!

Programme and Registration

On the event website www.fachtagung-abbruch.de/en you can view the programme of the FACHTAGUNG ABBRUCH as far as it is completed, which will be around the middle of December and find there all further information and details about the event.

There you can also make the exclusive online registration for participation at the FACHTAGUNG ABBRUCH 2022, as well available from around the middle of December.

The German Demolition Association is looking forward to welcoming and seeing you again!

Signs: 3.083 (without spaces)

Since 1951, the Deutscher Abbruchverband e.V. – DA (German Demolition Association) has been the leading business association in the demolition industry with a head office in Cologne and a further office in Berlin. Its over 800 member companies come from the fields of construction and industrial demolition as well as mineral waste recycling and remediation of pollutants. Engineering offices and machine manufacturers support the association as supporting members. The DA provides its members and the general public with comprehensive information on the technical and legal bases of demolition work and its development and ensures that practical experience is incorporated into political and economic decisions as well as into technical standards and regulations, especially in the environmental field. The focus of the association's activities is on education and training, environmental and recycling issues in connection with demolition work and construction waste, as well as quality assurance during demolition and dismantling.
