Due to the current pandemic development with the significantly increasing number of infections, the Deutscher Abbruchverband e. V. (German Demolition Association) unfortunately has to cancel its FACHTAGUNG ABBRUCH 2022 with a heavy heart!

We very much regret this step, but it is unfortunately necessary, especially since a forthcoming official rejection seems more than possible! This, even later than now, would pose even greater challenges to all of us.

We would have liked a different pandemic development at the beginning of 2022 and were still looking forward to our event until the end of the year. Now, unfortunately, things have turned out differently, which is very regrettable for you and for us. We hope for your understanding!

The high number of registrations, both in terms of participant registrations and in terms of square meter bookings by exhibitors, have shown us how much the demolition industry has been looking forward to the event and how important it is, so that expectations for 2023 are already high again.

We would like to take this opportunity to thank our sponsors for their support!

We hope that you will remain faithful to us and look forward to seeing you again at the FACHTAGUNG ABBRUCH 2023 on March 3, 2023, in Berlin – Europe's largest event for the demolition industry!

Since 1951, the Deutscher Abbruchverband e.V. – DA (German Demolition Association) has been the leading business association in the demolition industry with a head office in

Cologne and a further office in Berlin. Its over 800 member companies come from the fields of construction and industrial demolition as well as mineral waste recycling and remediation of pollutants. Engineering offices and machine manufacturers support the association as supporting members. The DA provides its members and the general public with comprehensive information on the technical and legal bases of demolition work and its development and ensures that practical experience is incorporated into political and economic decisions as well as into technical standards and regulations, especially in the environmental field. The focus of the association's activities is on education and training, environmental and recycling issues in connection with demolition work and construction waste, as well as quality assurance during demolition and dismantling.
