In 2023 finally again – The annual meeting of the European Demolition Industry

On 3rd March 2023, Deutscher Abbruchverband e. V. – DA (German Demolition Association) is organising the FACHTAGUNG ABBRUCH 2023 again at the STATION-Berlin, Luckenwalder Strasse in Berlin. With its rustic charm, this industrial monument, an old post station, is particularly suited to the demolition industry.

After last performance in 2020 with over 1,100 participants and 127 exhibitors attending the annual meeting of European players in demolition and dismantling and the inevitable pause this year the expectations and joy of the event for 2023 are high.

Lecture programme

Dr. Hajo Schumacher, the well-known journalist and publicist, will give **the keynote speech on the topic – “Demolition, change, awakening – Govern in uncertain times”**.

Afterwards, there will be 12 further lectures on the programme on current and interesting topics around demolition. In their lectures, the proven experts will provide a great deal of practice-oriented information on interesting construction site reports as well as on the handling of pollutants, recycled construction materials and legal requirements.

This year, among other things, information will be provided on **“Sustainable solutions in NRW – Use of recycled building materials and reuse of building components”**, as well as on **“Demolition of KSC Stadium”**. Other interesting lectures such as **“Complex use of different demolition methods für 250,000 t of reinforced concrete”** or **“Selected best practices of controlled blasting of buildings”** contribute to the proven mix of topics, as do various other specialist lectures, such as **“Technical rules (TV) demolition works 2023 – New edition of a successful rulebook”** and many more.

As the number of international visitors continues to grow, simultaneous translation into English will be offered again.

Accompanying professional exhibition

By the beginning of December the professional exhibition with its wide range of products has already attracted over 90 exhibitors with over 850 sqm area registered. The current list of exhibitors can be viewed on the event website and **registration as an exhibitor is still possible until 19th December 2022.**

Dialogue evening

As in the last years, the dialogue evening will also take place in the STATION BERLIN, so that the exhibition will remain open parallel to the dialogue evening. This improves the exchange and information opportunities for both sides - participants and exhibitors - and enables a variety of networking opportunities.

Sponsors

The fact that the FACHTAGUNG ABBRUCH is well established is shown by the very gratifying participation of sponsors who have already been won. The DA would like to thank its supporters for this!

Programme and Registration

On the event website www.fachtagung-abbruch.de/en you can view the programme of the FACHTAGUNG ABBRUCH 2023 all further information and details about the event.

There you can also make the **exclusive online registration as attendee** at the FACHTAGUNG ABBRUCH 2023, as well **possible until 10th of February 2023.**

The German Demolition Association is looking forward to welcoming and seeing you again!

Signs: 3.247 (with spaces)

Since 1951, the Deutscher Abbruchverband e.V. – DA (German Demolition Association) has been the leading business association in the demolition industry with a head office in Cologne and a further office in Berlin. Its over 800 member companies come from the fields of construction and industrial demolition as well as mineral waste recycling and remediation of pollutants. Engineering offices and machine manufacturers support the association as supporting members. The DA provides its members and the general public with comprehensive information on the technical and legal bases of demolition work and its development and ensures that practical experience is incorporated into political and economic decisions as well as into technical standards and regulations, especially in the environmental field. The focus of the association's activities is on education and training, environmental and recycling issues in connection with demolition work and construction waste, as well as quality assurance during demolition and dismantling.
